

PRECAST CONCRETE WORKER JOB DESCRIPTION

Assist in the construction, erection, repair and modification of precast concrete structures; work with wood, metal and/or concrete materials using a variety of hand and power tools. Precast Concrete Worker work involves any combination of duties and responsibilities that include:

- Perform daily job duties as directed by Foreman, including but not limited to:
 - Remove tarps, plastic and dunnage from product every morning or as needed.
 - Set gates and block-outs as required by layout and plans.
 - Pull cable / tie rebar as layout and plans dictate.
 - Cut cable, remove recess cups, remove gates and remove block-outs as directed.
 - Securely tie in embeds, inserts and other items as shown on the plans or layout.
 - Install mesh or other items required in product.
 - Apply form oil / bond breaker as directed; always take care not to get oil and/or bond breaker on cable or rebar.
 - Grind and clean beds or molds as the product is removed.
 - Stack, pack, carry, police and arrange materials as directed.
- Begin casting product by mucking, vibrating, screeding or other jobs as directed; always wear ear protection, rubber gloves, rubber boots and other protective clothing while pouring concrete.
- After casting apply sealer, visqueen, tarps, etc as directed.
- Never touch, grind, weld, cut, etc around cable or rebar without proper instruction.
- Clean up tools and work area at the end of shift or during shift as the work schedule permits.
- Use extreme caution when working around cranes, trucks, forklifts, loaders and other equipment. Never get under loads or spreader bar hanging from cranes.
- Always work safely and follow all established Bethlehem Construction, Inc. safety policies.
- Additional duties as assigned by Foreman and/or other management and/or supervisory personnel.

I have read the above and agree to perform according to this Job Description.
